

**COMMONWEALTH OF KENTUCKY
BEFORE THE PUBLIC SERVICE COMMISSION**

RECEIVED

SEP 16 2003

PUBLIC SERVICE
COMMISSION

IN THE MATTER OF:

**PETITION OF NPCR, INC. d/b/a
NEXTEL PARTNERS FOR
DESIGNATION AS AN ELIGIBLE
TELECOMMUNICATIONS CARRIER
IN THE COMMONWEALTH OF KENTUCKY**

CASE NO. 2003-00143

**NEXTEL PARTNERS' RESPONSES TO INFORMATION REQUESTS OF LOGAN
TELEPHONE COOPERATIVE, INC., ET AL.**

RESERVATION OF RIGHTS

The responses of NPCR, INC. d/b/a Nextel Partners ("Nextel Partners") herein are made without in any way waiving or intending to waive, but on the contrary, intending to preserve and preserving:

1. The right to question as to competency, relevancy, materiality, privilege and as evidence for any purpose, any information request, response or objection or the subject matter thereof in any subsequent proceeding or in the hearing of this or any other action;
2. The right to object to the use of any such responses, objections or subject matter thereof in any subsequent proceeding or hearing of this action or any other action;
3. The right to object on any ground at any time to a demand for further response to these or any other information requests involving or relating to the subject matter of the information requests responded to; and
4. The right at any time to revise, correct, add to, or clarify any of the responses herein.

GENERAL OBJECTIONS

To the extent these requests seek Nextel Partners to provide responses on behalf of Nextel Communications, Inc., Nextel Partners has no authority to do so.

Nextel Partners objects the instructions and definitions in the Requests to the extent they impose an obligations greater that allowed in the relevant rules of procedure and practice applicable before the Kentucky Public Service Commission.

RESPONSES TO INFORMATION REQUESTS

REQUEST NO. 1: For each ETC area, please provide a list of, and description of service offerings, rates and rate structures for services to be offered from each Nextel Partner including, where applicable, the amount of minutes of use included within the rate for such service and the calling scope of those minute.

RESPONSE TO 1: Nextel Partners objects to this Request as overbroad, and as seeking production of a substantial amount of information that is neither admissible nor reasonably calculated to lead to the discovery of admissible evidence, to the extent it would require Nextel Partners to identify all rate plans that might be in effect. Nextel Partners is not seeking approval of any particular offerings. Nextel Partners further objects to this request to the extent it would seek information about non-voice services.

Subject to those objections and without waiver thereof, Nextel Partners states that offerings currently available directly from the company will be provided. The minutes of use included in each plan are identified therein. For plans with long distance included, all calls within the United States (up to the allotted minutes) are made without additional charge. For plans without long distance included, the local calling areas are as follows:

Evansville, Owensboro	S Ill/S. Ind/W Kent
Lexington	Statewide KY/Southern Indiana

Louisville	Statewide KY/Southern Illinois
------------	--------------------------------

REQUEST NO. 2: Please describe in detail the "'universal service' offering" that Nextel Partners intends to offer in the context of its ETC designation request.

RESPONSE TO 2: Nextel Partners does not propose a "universal service offering" *per se*. Under the FCC's Rules, ETCs report line counts to the Universal Service Administrative Company ("USAC"). Any line of service that contains the FCC's supported services is an eligible line. Nextel Partners will comply with those directives. Nextel Partners expects that all of its voice customers will be eligible for universal service support. For example, each of the offerings identified in response to Information Request 1 contains the supported services and is eligible to be reported as a line.

REQUEST NO. 3: How does Nextel Partners propose that the public and the Commission determine whether its rates are just, reasonable, and affordable for the services and service areas associated with its ETC designated request?

RESPONSE TO 3: There is no requirement for the Kentucky Commission to judge whether individual service offerings provided by Nextel Partners are "just, reasonable, and affordable," and Nextel Partners does not propose that such a determination be made. In a competitive market, consumers decide what services best meet their needs. If consumers do not find Nextel Partners' service to be reasonable and affordable, they will not buy the service. If customers do not buy the service, Nextel Partners will obtain no universal service funding.

REQUEST NO. 4: Please provide boundary maps which indicate the service areas where Nextel Partners seeks ETC designation showing Serving Independent Telephone Group Member local exchange areas. Also, please identify RSA, MSA, Major Trading Area ("MTA"), and county boundaries as well as existing tower/antenna sites.

RESPONSE TO 4: Nextel Partners objects to producing documents it does not have. Subject to that objection and without waiver thereof, Nextel Partners will produce maps that show

projected signal propagation on top of Independent Telephone Group Member local exchange areas.

REQUEST NO. 5: Please provide a serviced coverage map (39 dbu contours) for each Nextel Partners company within each serving Independent Telephone Group Member local exchange area for which you have requested ETC designation.

RESPONSE TO 5: Nextel Partners objects to this Request as seeking information neither admissible nor reasonably calculated to lead to admissible evidence, and as requiring Nextel Partners to develop and produce information it does not currently have.

REQUEST NO. 6: What is Nextel Partners' signal strength in the areas in which it seeks ETC designation?

RESPONSE TO 6: Nextel Partners objects to this Request as vague as to what the term "signal strength" means. The maps produced in response to Request No. 4 demonstrate the areas in which a customer with a 3 watt phone can send and receive a signal.

REQUEST NO. 7: How does Nextel Partners determine what signal strength is sufficient to serve customers? Please provide all work papers, including maps showing signal coverage to support the response.

RESPONSE TO 7: Nextel Partners objects to this request as vague. Nextel Partners further objects as burdensome, overbroad, and as seeking information that is neither admissible nor reasonably calculated to lead to the discovery of admissible evidence. Nextel Partners has produced a signal propagation map based on its network data in response to Request No. 4. This signal propagation assumes a signal to be received and sent by a 3 watt unit, which is -105 db.

REQUEST NO. 8: Please identify any gaps (areas where wireless phone service is unavailable) in any of the areas in which Nextel Partners seeks ETC designation.

RESPONSE TO 8: Nextel Partners objects to this request as calling for information that is neither admissible nor reasonably calculated to lead to the discovery of information relevant to the matters presented in this proceeding.

An applicant for federal ETC designation does not have to prove that it has facilities throughout a service area prior to designation. The applicant need only show an intent and ability to serve once designated and to make a commitment to meet reasonable requests for service over time. *In the Matter of Federal-State Joint Board on Universal Service Western Wireless Corporation Petition for Preemption of an Order of the South Dakota Public Utilities Commission*, Declaratory Ruling, CC Docket 96-45, FCC 00-248, 15 FCC Rcd at 15175 (rel. August 10, 2000) ("*Declaratory Ruling*") (A telecommunications carrier's inability to demonstrate that it can provide ubiquitous service at the time of its request for designation as an ETC does not preclude its designation as an ETC. To do so would have the effect of prohibiting new entrants from providing telecommunications service). An applicant for ETC designation must be given the same reasonable opportunity to develop its network as that afforded an ILEC:

We find the requirement that a carrier provide service to every potential customer throughout the service area before receiving ETC designation has the effect of prohibiting the provision of service in high-cost areas. As an ETC, the incumbent LEC is required to make service available to all consumers upon request, but the incumbent LEC may not have facilities to every possible consumer. We believe the ETC requirements should be no different for carriers that are not incumbent LECs. A new entrant, once designated as an ETC, is required, as the incumbent is required, to extend its network to serve new customers upon reasonable request. We find, therefore, that new entrants must be allowed the same reasonable opportunity to provide service to requesting customers as the incumbent LEC, once designated as an ETC. Thus, we find that a telecommunications carrier's inability to demonstrate that it can provide ubiquitous service at the time of its request for designation as an ETC should not preclude its designation as an ETC.

Id. (emphasis added).

Subject to that objection and without waiver thereof, the maps produced in response to Request No. 4 shows any such gaps.

REQUEST NO. 9: Please explain how Nextel Partners plans to provide service throughout the service area of each Serving Independent Telephone Group Members.

RESPONSE TO 9: Nextel Partners will meet its obligation to provide service upon reasonable request. Nextel Partners provides service through much of those areas today, and expects over time to continue to extend its network in the state.

REQUEST NO. 10: Please explain how Nextel Partners provides a dedicated message path for use by its respective end user customers for that customer's communications transmission when the end user customer exits the Nextel Partners' geographic coverage area.

RESPONSE TO 10: If a customer leaves Nextel Partners' coverage area and is within Nextel Communications, Inc.'s coverage area, that dedicated message path will be picked up by a Nextel Communications cell site. If the customer leaves Nextel Partners' coverage area and is not within Nextel Communications, Inc.'s network, the customer's call will be terminated. At all times prior to the termination of that transmission, the customer will have a dedicated message path for his or her call.

REQUEST NO. 11: Does Nextel Partners provide "local exchange service" to its respective customers? If not, why not? If so, does Nextel Partners consider such "local exchange service" to be the same as "telephone exchange service" as that term is defined in the Act? If not, why not?

RESPONSE TO 11: Nextel Partners provides commercial mobile radio service ("CMRS"), which is not a local exchange service. However, the FCC has determined that two-way CMRS is "telephone exchange service" as that term is used under federal law.

REQUEST NO. 12: To the extent that there is more than one operating company of Nextel Partners for which Nextel Partners seeks ETC designation in Kentucky, please identify the different entities with respect to the responses to Requests 4 and 5.

RESPONSE TO 12: There is only one operating company for which Nextel Partners seeks ETC designation in Kentucky.

REQUEST NO. 13: Please provide the call completion rate for originating end user traffic over Nextel Partners network for a recent representative period to include at least three (3) months.

RESPONSE TO 13: Nextel Partners objects to this Request as calling for information that is neither admissible nor reasonably calculated to lead to the discovery of admissible evidence.

Nextel Partners objects to this request as burdensome and as requiring it to produce an analysis of data it does not record. This request appears to seek information on whether Nextel Partners meets certain standards that under the Commission's rules apply to local exchange carriers. Nextel Partners is not a local exchange carrier, and does not measure call completion rates. In addition, there are no ETC criteria under the FCC's rules or the Commission's rules that call completion standards or make such considerations relevant in an ETC proceeding.

REQUEST NO. 14: Please explain how Nextel Partners provides access to operator services to its respective end user customers and the dialing arrangements required for such end user customer to access such services. If access to operator services is not provided by Nextel Partners, please provide the name of the entity that provides such services.

RESPONSE TO 14: Nextel Partners' is in the process of activating operator service trunks. Once it does so, customers in Kentucky will be able to reach a BellSouth operator by dialing 0.

REQUEST NO. 15: With respect to the service options offered by Nextel Partners and identified in response to Request 1 above, does Nextel Partners have rate plans that offer different rates depending on the geographic scope of the call? Does Nextel Partners provide toll pre-subscription to its end user customers? If not, why not? If toll pre-subscription is not provided, please provide the name of the toll provider that Nextel Partners uses to provide along distance service to its end user customers.

RESPONSE TO 15: Nextel Partners objects to this Request as overbroad, and as seeking production of information that is neither admissible nor reasonably calculated to lead to the discovery of admissible evidence, to the extent it would require Nextel Partners to identify all rate plans that might be in effect. Nextel Partners is not seeking approval of any particular offerings. Nextel Partners further objects to this request to the extent it would seek information about non-voice services.

Subject to those objections and without waiver thereof, with regard to the plans identified above, the local calling areas in Kentucky are set forth in the response to Request 1. The national calling scope is 50 states.

Nextel Partners does not provide toll presubscription, or "equal access." Congress has preempted any requirement that a CMRS provider offer equal access. Nextel Partners is the customer's provider for all calls made, whether considered local or long distance, and whether or not such a call would be within the scope of 47 C.F.R. § 51.701 *et seq.*

REQUEST NO. 16: Can an end user customer that uses the services of Nextel Partners gain access to an inter-exchange carrier of the customer's choice through dial-around arrangements (101XXXX) and/or through use of a 1-800 number? When a Nextel Partners end user customer places a 1-800 (or similar "toll-free" NXX) call, does Nextel Partners charge the originating customer? If the customer has paid for an "amount of minutes" as part of its service offering as identified in response to Request 1 above, does the placement of the "toll-free" call count against that amount of minutes? Please respond to the same question with respect to an operator assisted "collect" or reverse charge call.

RESPONSE TO 16: Nextel Partners states that a customer can dial 1-800 numbers, but not 101XXXX numbers. 1-800 calls count against a customer's "bucket of minutes." Presently, Kentucky customers cannot reach an operator to make a collect call. Once those trunks are activated, a collect call will be able to be made by dialing 0, and would count against a customer's "bucket of minutes."

REQUEST NO. 17: Please specifically explain how Nextel Partners provides to its respective end user customers access to directory assistance, including, but not limited to, information contained in directory listings upon request of that customer.

RESPONSE TO 17: Customers can dial 411 and will be connected to directory assistance provided by Metro One.

REQUEST NO. 18: Please specifically explain how Nextel Partners plans to provide toll limitation service as defined by the FCC.

RESPONSE TO 18: Nextel Partners expects to provide Lifeline customers with an offering that contains no toll minutes, and to offer to block all outgoing toll calls at the customer's request. Nextel Partners can program the network to block such calls from a requesting Lifeline customer.

REQUEST NO. 19: Please specifically explain how Nextel Partners plans to provide lifeline and link-up service.

RESPONSE TO 19: Nextel Partners will provide telecommunications services to qualifying individuals who apply for Lifeline assistance as required by the FCC and expects to provide these consumers Nextel Partners' lowest cost generally available offering, with a discount, plus an option to add toll blocking. The term "Linkup" is not associated with a telecommunications service offering, but is a discount that applies to service initiation fees as prescribed in the FCC's regulations. Nextel Partners will comply with such regulations as required to serve qualified customers.

REQUEST NO. 20: Please describe in detail how Nextel Partners measures service quality on its network and provide any appropriate documentation.

RESPONSE TO 20: Nextel Partners objects to this Request as calling for information that is neither admissible nor reasonably calculated to lead to the discovery of admissible evidence. Nextel Partners further objects to this request as overbroad. The information requested is extremely competitively sensitive, and tightly guarded by the company.

This Request appears to seek information on whether Nextel Partners meets certain service standards that under the Commission's rules apply to local exchange carriers. There are no ETC criteria under the FCC's rules or the Commission's rules that establish standards for these items, or make such considerations relevant in an ETC proceeding.

REQUEST NO. 21: How does Nextel Partners determine the need for more transmission channels and/or cell sites?

RESPONSE TO 21: Nextel Partners objects to this Request as calling for information that is neither admissible nor reasonably calculated to lead to the discovery of admissible evidence.

REQUEST NO. 22: Does Nextel Partners comply with the Commission's quality of service rules? If not, why not?

RESPONSE TO 22: Nextel Partners understands that the Commission's service quality rules do not apply to providers of CMRS. Nextel Partners complies with all regulations that lawfully apply to it.

REQUEST NO. 23: Please specifically explain how Nextel Partners plans to advertise the availability of the service throughout the service area of each Serving Independent Telephone Group Member.

RESPONSE TO 23: Nextel Partners does not propose any specific advertising plans for consideration. Nextel Partners is not aware of any specific advertising requirements contained within state or federal law. The Nextel brand name is advertised through several different media, including newspaper, television, radio, and billboard advertising. Nextel Partners' nationwide advertising costs totaled approximately \$35.1 million for the year ending December 31, 2002. In Kentucky, Nextel Partners collaboratively advertises with Nextel Communications through media of general distribution, including newspaper, magazine, billboard and yellow page advertisements, as well as radio and television ads. In addition, Nextel Partners advertises through point-of-sale marketing efforts at various wireless-telecommunications and general-electronic retail stores and over the Internet at www.Nextel.com. Nextel Partners also maintains various retail store locations throughout its authorized service areas, which provide an additional source of advertising. Nextel Partners intends use the same media of general distribution that it currently employs to advertise its universal service offerings throughout the service areas.

REQUEST NO. 24: If the Commission were to establish a state USF, and assume that the Commission would require contributions to such state USF of all telecommunications carriers operating within Kentucky based on a carrier's intrastate end user revenues, should Nextel Partners' customer revenue be included in the contribution base? If not, why not?

RESPONSE TO 24: Nextel Partners would pay all taxes lawfully imposed on its services.

REQUEST NO. 25: In the event that the Kentucky PSC established a State Universal Service Fund, would Nextel Partners apply for state funding?

RESPONSE TO 25: Nextel Partners has not determined whether it would, in the future, seek state funding.

REQUEST NO. 26: Please identify whether Nextel Partners utilizes a company-specific percentage to determine its respective interstate Universal Service Fund ("USF") contribution obligation or whether Nextel Partners utilizes the FCC's USF safe harbor percentage. If company-specific percentages are used by Nextel Partners, please provide that percent.

RESPONSE TO 26: Nextel Partners uses a company-specific intrastate percentage of 15.6%.

REQUEST NO. 27: What interconnection arrangements and/or agreements does Nextel Partners have in place in Kentucky for the origination and/or termination of traffic between its end users and the end users served by serving Independent Telephone Group members?

RESPONSE TO 27: Nextel Partners objects to this request as seeking information that is neither admissible nor reasonably calculated to lead to the discovery of information relevant to the matters presented in this proceeding. Subject to these objections and without waiver thereof, interconnection and/or traffic exchange agreements, if any, are on file with the Commission.

REQUEST NO. 28: Assuming the ETC designation request of Nextel partners were granted, please identify the specific provisions of the Commission's regulations and oversight to which Nextel Partners is willing to agree to be subject as a "universal service" ETC provider in Kentucky.

RESPONSE TO 28: The FCC has provided that a state commission has ongoing authority to ensure that an any ETC is meeting its obligations as an ETC to offer and advertise the supported services. Such oversight authority is not dependent on the agreement of an ETC.

REQUEST NO. 29: For each Serving Independent Telephone Group Member, please indicate the number of CMRS users currently served by Nextel Partners for which Nextel Partners seeks designation and interstate Universal Service support disbursements.

RESPONSE TO 29: Nextel Partners objects to this request as calling for information that is neither admissible nor reasonably calculated to lead to the discovery of admissible evidence. Once designated as an ETC, Nextel Partners would be required to report lines to the Universal Service Administrative Corporation ("USAC"), and USAC will determine eligible lines and funding amounts.

REQUEST NO. 30: Please identify any other parties that Nextel Partners has contracted with to build, construct or otherwise maintain its network and related facilities.

RESPONSE TO 30: Nextel Partners objects to this request as seeking information that is neither admissible nor reasonably calculated to lead to the discovery of admissible evidence.

REQUEST NO. 31: Please provide all FCC documents related to status of Phase I and/or Phase II E-911 deployment (or the specific locations on the applicable FCC web page) for each of the counties for which Nextel Partners seeks ETC status.

RESPONSE TO 31: See <http://www.fcc.gov/911/enhanced/reports/phase2-waiver.html>. Nextel Partners' August 1 E911 Report, including a status matrix of Phase I and Phase II requests nationwide, are produced herewith.

REQUEST NO. 32: How will an end user customer of Nextel Partners in each serving Independent Telephone Group member's serving area contact Nextel customer service concerning trouble with their service or complaints about their billing?

RESPONSE TO 32: Customer care can be reached by dialing 611 from a Nextel phone, or by dialing 1-800-NEXTEL9 from another phone.

**NEXTEL PARTNERS, INC.
PHASE I AND PHASE II E911 QUARTERLY REPORT
August 1, 2003**

**To: Chief, Enforcement Bureau
Chief, Wireless Telecommunications Bureau**

INTRODUCTION

Pursuant to the October 12, 2001 Order of the Federal Communications Commission ("Commission" or "FCC") in CC Docket No. 94-102,¹ Nextel Partner, Inc. ("Nextel Partners") respectfully submits this Enhanced 911 ("E911") Quarterly Report on its implementation of Phase I and Phase II E911. Nextel Partners achieved its first Phase II benchmark, October 14, 2002, when it began selling and activating an Assisted Global Positioning Satellite ("A-GPS") handset. Since that date Nextel Partners has begun selling a second A-GPS handset model and has launched 60 Public Safety Answering Points ("PSAPs") with Phase II service. Herein, Nextel Partners provides an update on all relevant events impacting handset upgrades and network infrastructure necessary to

¹ *In the Matter of Revision of the Commission's Rules To Ensure Compatibility With Enhanced 911 Emergency Calling Systems, Wireless E911 Phase II Implementation Plan of Nextel Communications, Inc.*, Order, CC Docket No. 94-102, FCC 01-295, released October 12, 2001 ("Nextel Waiver Order").

enable Phase II E911 location capabilities as well as a listing of all deployed and pending requests for Phase I and Phase II E911 service and the status of each request.

BACKGROUND

Pursuant to the Nextel Waiver Order, the Commission imposed on Nextel Partners and Nextel Communications, Inc. ("Nextel") the following Phase II E911 implementation benchmarks:

- October 1, 2002:* Begin selling and activating A-GPS-capable handsets;
- December 31, 2002:* Ensure that at least 10% of all new handsets activated are A-GPS-capable;
- December 1, 2003:* Ensure that at least 50% of all new handsets activated are A-GPS-capable;
- December 1, 2004:* Ensure that 100% of all new digital handsets activated are A-GPS-capable;
- December 31, 2005:* 95% of all subscriber handsets in service are A-GPS-capable.²

As Nextel Partners has detailed in its previous Reports,³ Nextel Partners, Nextel and Motorola began developing an A-GPS capability for Nextel's integrated digital enhanced network ("iDEN") technology in the Fourth Quarter of 2000, prior to the Commission granting Nextel's waiver request. Launching a complicated technology to first calculate, and then deliver, location information from an iDEN handset to a PSAP, particularly in the compressed timeline demanded by the Nextel Waiver Order, required extraordinary efforts and unprecedented coordination among numerous entities. This

² Nextel Waiver Order at ¶37.

³ See, e.g., *Nextel Partners Inc. Phase I and Phase II E911 Quarterly Report*, CC Docket No. 94-102 (Nov. 1, 2002) ("Nextel's November Report"); *Nextel Partners, Inc. Phase II E911 Quarterly Report*, CC Docket 94-102 (Aug. 1, 2002); *Nextel Partners, Inc. Phase II E911 Quarterly Report*, CC Docket 94-102 (May 1, 2002).

multi-party coordination continues as Nextel Partners and Nextel introduces additional A-GPS capable handsets and deploy individual PSAPs.

DISCUSSION

A. A-GPS Capable Handsets

Following the launch of its first A-GPS capable handset, the i88s, on October 14, 2002 in compliance with its first Phase II implementation benchmark, Nextel Partners introduced its second A-GPS capable handset, the i58sr, on January 1, 2003. Nextel Partners continues to work with its sole handset vendor, Motorola, to develop additional A-GPS capable models, three of which are planned to launch commercially by the end of 2003 commencing at the beginning of the Third Quarter with an aggressive roll out schedule. Nextel Partners, via an independent third-party consultant, completed accuracy testing of its A-GPS handsets prior to its October 14, 2002 benchmark date and met the Commission's accuracy standards. Per Nextel's Waiver Order, the next deployment benchmark period on which Nextel Partners must report ends on November 30, 2003. Nextel Partners will report on that benchmark in its February 2004 Quarterly Report.⁴

B. Network Infrastructure

Nextel Partners remains committed to working cooperatively with PSAPs throughout the country to deploy PSAPs as efficiently as possible and has made notable progress since its May Report. Nextel Partners continues to deploy its two Phase II methodologies, which use Emergency Service Routing Keys ("ESRK") and Emergency Services Routing Digits ("ESRD"), and simultaneously has added further functionalities

⁴ Nextel's Waiver Order states that "Nextel must report, in the Quarterly Report immediately following the benchmark date...for the periods of December 31, 2002 to November 30, 2003..., the percentage of new handsets activated nationwide during the respective periods that were A-GPS capable, as well as the total number of new handsets during those periods that were A-GPS capable." Nextel Waiver Order at ¶ 32.

to its service.⁵ In some cases, however, because of complexities inherent in deployments and the numerous parties involved—and despite rigorous network and component testing by Nextel Partners and Motorola prior to its October 1, 2002 Phase II launch—Nextel Partners continues to discover end-to-end connectivity issues with some deployments that can create delay.

When it launched its Phase II service on October 14, 2002, Nextel Partners provided PSAPs a static class of service call identification, which typically was associated with Phase II location information, for all calls. In an on-going effort to provide public safety with the best location information possible on its wireless system, Nextel Partners and Nextel, with the assistance of its third party vendor Intrado, resolved initial technical deployment complexities and began to offer dynamic class of service, which differentiates Phase I from Phase II calls, on July 7, 2003. Initially this functionality has been provided to PSAPs in territories served by Verizon, Sprint and SBC and Nextel Partners anticipates completing rollout, where technically capable, of this functionality to PSAPs in areas served by other local exchange carriers (“LECs”) by the end of September 2003.

On June 6, 2003 the Commission released a Public Notice setting forth uniform requirements governing the Appendix format in which carriers submit both Phase I and

⁵ As Nextel noted in its May 2003 Report, some PSAPs require a Phase II solution using ESRD rather than ESRK, which is the solution Nextel Partners and Nextel supported when they launched their Phase II technology. Either ESRK or ESRD is a technologically acceptable signaling solution to allow the PSAP to obtain E911 Phase II information from the wireless carrier’s network. ESRK may also be referenced as non-call path associated signaling (“NCAS”) or wire line compatibility mode and ESRD may be referenced as hybrid call path associated signaling (“HCAS”).

Phase II deployment information with each Quarterly Report.⁶ Per these requirements, Nextel Partners has attached Appendix A, which is discussed in further detail below.

C. Phase I Requests

With respect to the Commission's requirement that Nextel Partners provide "information on all pending Phase I and Phase II requests,"⁷ Nextel Partners has attached Appendix A listing all of its 71 pending Phase I requests and their current status. For each of the on-going Phase I deployment efforts, Appendix A provides all of the required information including the master PSAP registry identification number ("PSAP ID"), PSAP name, PSAP state, PSAP county, request date, whether the request is valid,⁸ a projected deployment date, reasons hindering deployment within the first six months of a PSAP's request and comments.⁹ The proposed deployment dates in Appendix A are projected dates, which Nextel Partners and the relevant PSAP are striving to meet. Nextel Partners is in regular contact with each of these PSAPs and is working to deploy Phase I E911 as soon as possible. Nextel Partners has fully deployed Phase I E911 service with 435 PSAPs, which are listed on Appendix A.

⁶ Public Notice, *Wireless Telecommunications Bureau Standardizes Carrier Reporting on Wireless E911 Implementation*, CC Docket No. 94-102, rel. June 6, 2003. According to the Public Notice, "[t]he submission of the attached spreadsheet will permit the Commission to track wireless E911 deployment in a more uniform and consistent manner, as well as assist E911 stakeholders in coordinating their deployment efforts."

⁷ See Nextel Waiver Order at ¶32.

⁸ Per Nextel's Waiver Order, Nextel Partners is required to report whether it believes each deployment request is (or is not) valid. See Nextel Waiver Order at ¶32.

⁹ In some cases there are delays caused by technology issues. Such delays do not necessarily mean that the PSAP or Nextel Partners is not "ready" for Phase I service. Rather, it often means there are issues involving incompatible technologies between Nextel Partners, the LEC and/or the PSAP.

D. Phase II Requests

Appendix A provides every pending Phase II request and associated information including the PSAP ID, PSAP name, PSAP state, PSAP county, request date, whether the request is valid,¹⁰ a projected deployment date, reasons hindering deployment within the first six months of a PSAP's request and comments. Nextel Partners has 99 remaining pending Phase II requests and has asked that each of these PSAPs provide the documentation required in the *Richardson Order* for determining the request's validity.¹¹

Similar to Phase I deployments, the proposed Phase II deployment dates in Appendix A are projected dates, which Nextel Partners and the relevant PSAP are striving to meet. Nextel Partners reiterates that accomplishing such deployments is subject to numerous factors and parties outside of Nextel Partners' control; thus, Nextel Partners' deployment schedule establishes a goal toward which Nextel Partners will work. It is possible, however, that complexities may be encountered that could delay some PSAP deployments. Nextel Partners is in regular contact with each of these PSAPs and is working to deploy Phase II E911 as soon as possible within mutually agreed upon time frames. Nextel Partners will continue to dedicate significant resources to maintain its aggressive roll out schedule to PSAPs that are capable of receiving and using location technology.

Since October 14, 2002, its first implementation benchmark, Nextel Partners has deployed Phase II service with 60 PSAPs, which are included in Appendix A. Notably,

¹⁰ See note 8 herein.

¹¹ See generally, *In the Matter of Revision of the Commission's Rules To Ensure Compatibility with Enhanced 911 Emergency Calling Systems, Petition of City of Richardson*, Order On Reconsideration, CC Docket No. 94-102, FCC 01-293, released November 26, 2002. See also, *Revision of the Commission's Rules To Ensure Compatibility with Enhanced 911 Emergency Calling Systems*, CC Docket No. 94-102, Order on Reconsideration, released Nov. 26, 2002.

of these 60 PSAPs, 29 have been deployed since Nextel Partners' May 1, 2003 Quarterly Report. Nextel Partners remains actively engaged with PSAPs at multiple locations and anticipates deploying Phase II service in additional areas in the near future, including the Commonwealth of Virginia, Jefferson County, KY, and Lubbock County, TX, consistent with mutually agreeable timeframes.

CONCLUSION

As required in the Nextel Waiver Order,¹² Nextel Partners is providing this Quarterly Report to the Executive Directors and counsel of the Association of Public Safety Communications Officials-International, Inc. ("APCO"), the National Emergency Number Association ("NENA") and the National Association of State Nine One One Administrators ("NASNA"). Should any of these organizations or their individual PSAP members have questions or concerns about Nextel Partners' submission, Nextel Partners encourages them to contact Peter Gaffney, at the number listed below, as soon as possible to facilitate rapid and efficient deployment of Nextel Partners' Phase I and Phase II E911 services.

Respectfully submitted,
Nextel Partners, Inc.
